

Meet Dr. Scott Schulz

Traverse City, MI

1) What is your favorite GLAO memory?

I really enjoyed the GLAO annual session in New Orleans. It was a combined meeting and the lectures were great. I got a lot of one-on-one time with old friends and some of my professors from my ortho residency. It's always great to learn and explore a cool city with your colleagues at the GLAO meeting.

2) What advice would you have for younger members beginning their careers?

Visit orthodontic practices of your friends/mentors. There is so much to learn (what to do, and not to do) from the team members and doctors at other practices.

Monetarily, invest in your practice first. At home, save and invest early and hold off on extravagant expenses. Time is everything with investments.

3) If you were not an orthodontist what would you be and why?

Within the dental profession, an oral surgeon. I always loved extracting teeth, and I think I would be constantly stimulated by the complexity of the work. Outside of dentistry, I think I would have been happy as a college biology professor. I love biology and research, and working with college students would be challenging and rewarding.
